Software Engineer with 7+ years of experience building enterprise-scale web applications across healthcare, environmental GIS, and business software domains. Strong background in JavaScript, Typescript, React.js, Vue.js and Node.js with a passion for creating high-performance, intuitive user interfaces. Experienced collaborating with cross-functional teams in Agile environments to deliver scalable products used by enterprise customers. Recognized for solving complex frontend challenges, building reusable component architectures, optimizing application performance, and translating sophisticated business requirements into polished user experiences.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3/Sass

Frameworks & Libraries: React.js, Next.js, React Native, Vue.js, Node.js, Express.js, Redux, Vuex, Material-UI, Tailwind CSS, Quasar, Vuetify

Testing Frameworks: Cypress, Jest, Playwright, Vitest, React Testing Library

Databases & ORMs: PostgreSQL, MongoDB, MySQL, Prisma / TypeORM

Tools & Platforms: Git, GitHub, Docker, AWS, Azure DevOps, Jira

Build Tools & Bundlers: Vite, Webpack, Babel, npm / pnpm / yarn

AI Tools: Codex, Cloud Code, GitHub Copilot

Architecture & Methodologies: RESTful APIs, GraphQL, Microservices, Agile/Scrum

EXPERIENCE

Watersuite

June 2021 – Present

Software Developer

Braintree, MA

- Developed and maintained WaterSuite project, a React.js, Redux, Javascript and Typescript web platform supporting water-quality management, monitoring-site operations, source-water protection, compliance workflows, and customer-facing reporting.
- Built sophisticated geospatial workflows with OpenLayers and Turf.js, including interactive layers, feature selection, WMS/reference data, shapefile handling, boundary editing, site and pipe management, labeling, and map-based analysis.
- Maintained stage-based Delivered data-intensive operational UI across 483 React components and 129 JavaScript modules, spanning dashboards, point details, contaminants, contacts, attachments, alerts, reports, and administrative workflows. configuration, production build workflows, Redux state management, and reusable frontend components.
- Implemented secure, stage-aware frontend integrations using Redux, session-based authentication, Vertex Event Bus APIs, AWS S3 uploads, and environment-specific deployment configuration.
- Improved application reliability and user experience through route guards, state-preserving navigation, async error handling, performance-conscious Web Workers, and progressive-web-app support.
- Developed and enhanced a Vue 3, Javascript, Typescript, Quasar, and Tauri desktop application for coastal shoreline analysis.
- Translated user feedback and product requirements into practical UI improvements and new features.
- Built and enhanced responsive, user-friendly interfaces for a desktop data-analysis application.
- Improved complex multi-step workflows through clearer forms, validation, confirmations, and error handling.
- Collaborated with product, domain experts, and testers to identify usability issues and deliver polished solutions.
- Investigated and resolved frontend issues to improve reliability and reduce user confusion.

Consis

03/2018 – 06/2021

Software Developer

Tirana, AL

- Built healthcare platforms using Vue, Quasar, Node.js, Express, MongoDB, and REST APIs integrations.
- Developed secure workflows for patient communication, medical history, and appointment scheduling.

- Integrated real-time communication features enabling live doctor-patient video sessions.
- Implemented API security enhancements and improved encrypted data handling to strengthen HIPAA compliance and protect sensitive patient information.
- Created scalable APIs for telehealth operations and real-time medical monitoring.
- Built dashboards for healthcare professionals to visualize trends and key patient metrics.
- Implemented role-based access control (RBAC) to secure application routing based on user permissions and roles.
- Built cross-platform mobile features with React Native, integrating REST APIs and reusable components.

EDUCATION

Canadian Institute of Technology

Bachelor of Science – Computer Science & Programming

Tirane, AL

10/2014 – 10/2017
